ABOUT ME

A Front-end developer passionate about creating engaging and secure applications. Also exploring backend stuff, I've explored various technologies in this field. Excited to keep learning and aiming to become a Full Stack Developer.

SKILLS

- HTML
- CSS
- Tailwind
- JavaScript
- React JS
- Git & GitHub
- Redux
- VScode
- Postman
- Linux
- JAVA
- Node JS
- Express Js
- MongoDB

PROJECTS

Draft Wood [code](#)

- Led the development of a comprehensive e-commerce platform using the MERN (MongoDB, Express.js, React, Node.js) stack. Integrated robust user authentication functionalities to ensure secure access, while also implementing an intuitive admin dashboard for efficient management of products, orders, and customer interactions. Incorporated a secure payment gateway to enable secure transactions, enhancing the overall user experience and driving customer satisfaction.

Disney clone [code](#)

- Developed a Disney clone web application using React and Redux for frontend state management, providing users with an immersive experience reminiscent of the Disney brand.
- Leveraged Firebase for backend services, including user authentication and real-time database functionality, ensuring secure access to content and dynamic updates.

User Authentication User [code](#)

- Led the development of a user authentication project leveraging JSON Web Tokens (JWT) for secure authentication, alongside encryption mechanisms to safeguard user passwords and sensitive data.
- Managed the Express.js server environment, implementing robust authentication endpoints and middleware, ensuring seamless integration and secure communication between client and server components

Personal Portfolio [code](#)

- Designed and developed personal site using React & tailwind, had a great practice in debugging

EDUCATION

JAIN UNIVERSITY

Majors: Full Stack development

2023-2025

The Oxford college of science

Bachelor of Computer Applications

2019-2022

CERTIFICATIONS

CodeDamn

Certified in HTML CSS JavaScript React Linux
