- MongooDB
- Linux

EDUCATION

MCA PROGRAM -**JAIN UNIVERSITY** (2022-2024)

BCA (2019-2022)
The oxford college of science
7.5 CGPA

SEBA (2017-2019)
SSMRV PU College

PROJECTS

DraftWood E-Commerce Web Application (MERN Stack)

- Developed an end-to-end e-commerce web application focusing on furniture retail, encompassing an admin dashboard and a user-friendly sliding bar for customers.
- TechStack HTML, CSS, JavaScript, React.js, Node.js (for backend), MongoDB

Disney-clone (React,React-Redux,Tailwind, Firebase)

- Engineered a feature-rich Disney+ clone, utilizing React for dynamic UI, React-Redux for efficient state management, Tailwind for sleek styling, and Firebase for backend
- Implemented key features like user authentication, ensuring an immersive and responsive user experience.

User Authentication Project (MERN Stack)

- Engineered a robust user authentication system leveraging the MERN stack, prioritizing security through advanced hashing techniques for user password protection.
- Focused on user data protection by integrating encryption methods, providing a secure foundation for sensitive information.
